

# Tattle-Tape™ Security Strips & Applicators

Tattle-Tape™ Security

Used by more libraries than all other security strips combined, 3M™ Tattle-Tape™ Security Strips offer discreet protection for your entire collection, including magnetic media. Strips can be quickly desensitized during checkout and fully resensitized to their original strength at check-in. And they're guaranteed for the life of the items they protect if applied within two years of date of manufacture.

**(a) Tattle-Tape™ Security Strips DCD-2** These precision-balanced strips are designed for single-sided CDs and DVDs. The easy, one-step application process integrates two strips into a clear film overlay that prevents removal and protects the surface of the disc.

**(b) Tattle-Tape™ Security Strips B2** Ultra-thin, double-sided strips are designed to be applied between pages of books and periodicals. The extra-long liner makes it easier to insert the strip deeply into the gutter, making it virtually undetectable.

**(c) Tattle-Tape™ Security Strips B1** Single-sided strips are designed for hardcover books. Strips can be easily inserted into book spines with a bayonet either on a countertop or right in the stacks. Strips are completely concealed.

**(d) Tattle-Tape™ Security Strip R2** Applied with the Tattle-Tape™ Application System, these strips are in roll format with no liners to remove. They're automatically dispensed and can be applied to print materials five times faster than traditional strips.

**(e) Tattle-Tape™ Application System** With this device, you can apply Tattle-Tape™ Security Strips to print materials three to five times faster than applying the strips by hand. Use it in the stacks or behind the scenes. UL-certified.

**(f) Tattle-Tape™ Security Strips DVM-1** These strips are designed for unboxed videocassettes. Strips are hidden by a cover-up label that can be printed with a title or other information.

**(g) Tattle-Tape™ Security Strips DAC-1** These strips are designed for unboxed audiocassettes. Strips are hidden by a cover-up label that can be printed with a title or other information.

## Performance Guaranteed

3M stands behind our Detection Systems and Tattle-Tape™ Strips with a 100% Performance Guarantee and also an 80% Loss Reduction Guarantee. See your 3M sales consultant for details or refer to the inside back cover of this catalog.

## Full 3M System Compatibility

3M™ Tattle-Tape™ Strips and 3M™ Detection Systems have been carefully designed to work effectively as an integrated system. 3M utilizes the highest quality raw materials combined with Statistical Process Control methods to control and improve manufacturing methods. As a result of a proprietary testing method, 3M can guarantee that every strip manufactured will perform to the necessary level required by the 3M™ Detection System. 3M cannot guarantee that the manufacturing processes or formulations of other manufacturers will produce the same performance characteristics as 3M strips, which could lead to performance issues and/or unwanted alarms.
